### BIOGRAPHY.

Joseph Barceii, a man of letters of some distinction, was here at Tarin, shout the year 1716. His fasher was an architect, employeed under Don Philip Insura, a Skellinn, who hash wevers considerable edites, is and note Tarin. Young Barteit received a good obcenties, and tome patternd property, which has, from his own and mains, he second edition of the second second pattern exceeded a good obcenties, and tome patternd property, which has, from his own and mains, he second edition of the second pattern exceeded a good obcenties, and tome patternd property, which has, from his own and has adjusted in percentage (Othis and) for exampling and descentary, and, prelable, after adjusted to percentage distance of tarihan a some £-agilish geneleners. Two yours after work, he came in England, charitances, and this aloud was thenceforth Charitances, and this indust was thenceforth to subact in arread, his constitut trainform. A wonderful alight is associated to percentage the output of the property of the subacter of the subact in a star bare pattern of first Charitances, and this island was monitour trainformed of the subact in a particular the subacter of the subact in a property of the subact in a subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the interment of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subact in a subacter of the subacter of the subacter of the subact is a subacter of the subacter of the subact in a subacter of the subacter of the subacter o true, but the severity of its criticions related storm of ennity equival the authors, which rem dered his abusic is that constry suppresses, it set ennatio. After an ultimate of six years, he retramed derength Spain and Portugal to Keng land, where he resumed his literacy accorddown.

In 1996, he published " An Accessed of the Manneres and Contents of Indy," principally incoded as a puply to the sources estimates conaload in the "Leature from Endy," by Mr. Am, Shang, the surgeon. Sharp had indeed evittee hits a projudiced Englishman, incapation of making data subservaces for the difference of stee and haling, and strengthy impressed with he impervasors of all the more approximation stee and haling, and strengthy impressed with he impervasors of all the source approximation which his own conserve classes. Barriello, water and haling, and sciences of the source of the attribution of all the source approximation which his own conserve classes. Barriello, water ging lightly not only differences in markers in the marker halosensite manters, but the marker early an lowar (bustnesses with and servars), could sourcedry hower endoargered has persona, and dow fact was decoupled an undertenant example of the persyneadry to excluding which has bad taken prote to reform, which beyong as a charge against the Indiane, by Me. Sharge. It is samerend ton, thus, in far from obvious any or remeans far the Indian of the from obvious any or remeans for the Indian of the from obvious any or remeans for the Indian of the from obvious any or remeans for the Indian of the from the start of the persons of contrast freely, which the problem. This is the wavenue the antimized the obligator.

In 1770, he published his "Journer Boas Landits to Genza, through English, Portugi, Rpsin, and Pounce," a volution of a sprightly and caterritating particemance, english with lively train of messers and sectionsis, and every where maintaining the character of the production of the reveller, incommendating hierard and grift diversions, and superior to training difficulties. He consistent to publish introducting works for the new of studements of the publish introduction.

Cultivating Forums of Citizenship

CATHERINE O'DONNELL KAPLAN Men of Letters in the EARLY REPUBLIC HE PORT FOLIO Cultivating Forums of Citizenship

Catherine O'Donnell Kaplan, Men of Letters in the Early Republic: Cultivating Forums of Citizenship. Chapel Hill: The University of North Carolina Press for the Omohundro Institute of Early American History and Culture, 2008. 256 pp., paper, \$24.95.

On a chilly evening in early December 1795, seven members of New York City's Friendly Club convened at William Dunlap's lodging for their weekly meeting. Dunlap opened the proceedings with a reading from Helen Maria Williams's recent publication, Letters from France, and for nearly five hours, the attendees discussed literary works and debated current issues. Satisfied that the meeting had generated a stimulating conversation, Elihu Hubbard Smith recorded in his diary that "[t]his evening has been better spent, than usual."

In Men of Letters in the Early Republic, Catherine O'Donnell Kaplan examines why Smith, along with many other young men residing in the Northeast, attached great importance to intellectual labor and exchange. These aspiring literati, Kaplan observes, perceived that belletristic endeavors were necessary for maintaining a healthy and harmonious society. Their vision of a national community bound by practices of sociability, sensibility, and learning constituted a radical critique to the notion that formal political participation defined citizenship, and this vision offered a welcome alternative to the intense personal and ideological partisanship of post-Revolutionary America.

In her investigation of how "men of letters" articulated a civic role for themselves and whether there was "a place and a use in the new United States for these men and their different kind of citizenship" (12), the author focuses on three sets of individuals and their affiliated literary networks: Elihu Hubbard Smith and the Friendly Club in New York; Joseph Dennie of Walpole, New Hampshire, and later Philadelphia; and the trio of William Smith Shaw, Arthur Maynard Walter, and Joseph Stephens Buckminster, who formed the core of the Boston-based Anthology Society and founded the Boston Athenaeum. Kaplan notes that these groups exhibited several shared traits, most notably adherence to

social elitism, masculine identity, and transatlantic modes of polite culture. Even so, she goes on to show that they each formulated different models for social and political improvement.

For Smith, a physician and prolific author of prose and poetry, the accumulation and dissemination of all types of knowledge in a convivial setting was the means by which individuals effected change and "created harmony and pursued justice" (7). The aptly named Friendly Club provided a space where Smith could collaborate with others on projects of self- and social reform. Here he could converse with colleagues of various vocations-the novelist Charles Brockden Brown, the jurist James Kent, and the dramatist William Dunlap—about the progress of the local manumission society to which they belonged, discuss Brown's latest novel or Dunlap's latest play, or go over innumerable other topics. Friendly Club meetings, however, were only one of many literary venues available to Smith. As Kaplan surmises, "Rather than a self-sustaining circle, the Friendly Club was a node in a network of linked and interdependent groups" (43). Smith's involvement with the Medical Repository and his frequent conversation and correspondence with women literati further demonstrate that the network contained overlapping realms of oral, manuscript, and print communications.

Like Smith, Joseph Dennie, a reluctant lawyer, created an active literary network, producing three periodicals with varied success—the *Tablet* in Boston, the *Farmer's Weekly Museum* in Walpole, and the *Port Folio* in Philadelphia—and participating in Philadelphia's Tuesday Club. Kaplan attributes the longevity and popularity of Dennie's Walpole paper to his ability to create a geographically extensive network of "all those who read, wrote for, found subscriptions for, extracted, or even quoted the *Museum*" (122). To solidify his readers as a distinct community, Dennie employed an editorial style based on intimacy and humor. Although he lambasted overt partisanship, his writings nonetheless imparted Federalist sympathies. Moreover, unlike Smith, Dennie favored "ephemeral wit" over "empirical information" as a means of exposing truth (9).

For Bostonians Joseph Stephens Buckminster, a Unitarian minister, Arthur Maynard Walter, a lawyer, and William Smith Shaw, the clerk of the District Court of Massachusetts, belles lettres provided a refuge from the mundane and at times maddening world of "commerce and politics" (11). In contrast to Smith and Dennie, these men did not pursue a national framework for their reforming efforts, developing in its stead "a more parochial vision of cultural community" (189). Relying on an impressive literary network that spanned Boston and Cambridge, the Anthology Society revived the *Monthly Anthology*, a local periodical, and formed the Athenaeum, a private reading room that served Boston's mercantile elite.

Kaplan concludes that although Smith, Dennie, and the Anthologists established "lasting forums and institutions," such as the *Medical Repository*, the *Port Folio*, and the Boston Athenaeum, they nonetheless failed in their quest to

transform notions of American citizenship (231). Even if their literary endeavors did not reconstitute civil society throughout the fledgling United States, the evidence presented in *Men of Letters* suggests that these belletrists did shape emergent cultures in local and regional spaces. As Trish Loughran has recently claimed in *The Republic in Print* (New York, 2007), transportation and communication deficiencies precluded the possibility of a viable national public in print. Kaplan's examination similarly forces us to move beyond a national framework and to foreground the local and regional networks at work in the post-Revolutionary era.
